

Inventory

Inventory modules allow user to manage their products' inventory and movements in orderly manner. Transactions for stocks inbound, outbound, and logistics are chronologically ordered for easy understanding of the order of the process flow.

Masters

This is where all the masters for the inventory module are defined, i.e. warehouse, products, shipping methods, customs duty, etc.

Inbound

Company's inventory inbound transactions process for inbound stock activities

Outbound

Company's inventory outbound transactions process for outbound stock activities

Logistics

Company's inventory logistics process for stock activities

Inventory Reports

Reports and analysis for reports related to products' inventory, stock inbound and outbound movements, and inventory related matters
