

Roles, Access Rights

This view allows user to define access rights for different users. Below actions are available under **“Roles, Access Rights”**:

-  Create the role, modify, search and delete
-  Assign & un-assign user to/from the role.
-  Apply system features access level for the role.

The screenshot shows the 'Roles, Access Rights' application window. The main table lists roles with columns for Role Code, Role Name, and Description. The role 'Demo-view' (R00) is selected. To the right, a form allows configuration of the selected role, including fields for Role Name, Role Code, Sub Role Of, Access Level, and Description. Below the main table, there are sections for 'System Feature Access' and 'System Users'. The 'System Feature Access' section shows a tree view of organization modules and a list of settings with checkboxes. The 'System Users' section is currently empty.

This screenshot shows the 'Roles, Access Rights' application window with the 'Assigned Users' section active. The 'Demo-view' role is still selected. The 'Assigned Users' section displays a table of users assigned to the role. The 'Available Users' section shows a list of users with checkboxes for assignment.
