

Sales Trend Model

The Sales Trend Model application allows the user to develop Trends quickly, to analyze your sales by month, quarter and year. Compare your data not only by this year's performance, but by year-to-year-periods, as well. This will assists in the demand planning for product trending over a period of time and stock purchasing accuracy will be greatly improved.

User's are allowed to make changes to the historical data for the near to correct prediction of the forecast.
