

How to Deploy (Install) and Open the Application

How to Install:

1. Open web browser in the Handheld Scanner
2. Enter company server webstart URL (given by Samootha)

[Launch Samootha - Vast Diversified Application](#)

[Windows](#)

[Mac](#)

[Scanner Application](#)

[Window Mobile 6.5](#)

3. Download the Scanner Application to default download folder
4. Open the (download) folder and double-click on the samootha.cab file, this will run the installer
5. Select “**Application**” from the options available
6. Click “**Install**” button, once installation is successful, click “**OK**” button

How to Open the Application:

Go to “**File Explorer**” > **Program Files** > **Samootha (folder)**, then click “**SamoothaScanner**” application file. This will launch the Scanner Application
