

How to select the Customer in the ticket?

When a repeat Customer returning to purchase more items from the store the following steps will apply:

- Select Customer from customer database by using Customer name or phone number
- Customer reward points will be shown next to customer textfield

The screenshot displays the 'Point of Sale Entry' window. It features several input fields: 'Date' (02/03/2015), 'Receipt' (<-AUTO-GENERATED->), 'Cashier' (EMP003 - Elvy ee), and 'Sales Staff'. The 'Customer' field is highlighted with a red box and contains 'Elizabeth Tan Liz'. To the right of the 'Customer' field is a 'Loyalty Joined On Points' section, also highlighted with a red box, showing a date of '09/02/2015' and a value of '0'. There are also some small icons between the 'Customer' and 'Loyalty' sections.

The cashier is able to remind the customer the balance of points as a service (subject to Store SOP)
