

How to select the Customer in the ticket?

When a repeat Customer returning to purchase more items from the store the following steps will apply:

- Select Customer from customer database by using Customer name or phone number
- Customer reward points will be shown next to customer textfield

The screenshot shows a software interface titled "Point of Sale Entry". It contains several input fields and buttons. Two areas are highlighted with red rectangles: the "Customer" field, which displays "Elizabeth Tan Liz", and the "Loyalty Joined On Points" section, which shows a date of "09/02/2015" and a value of "0". Other visible fields include "Date" (02/03/2015), "Receipt" (<-AUTO-GENERATED->), "Cashier" (EMP003 - Elvy ee), and "Sales Staff".

The cashier is able to remind the customer the balance of points as a service (subject to Store SOP)
