

How to set up Redemption rules in POS?

Before reward points can be redeemed, the Setup rules for reward points' redemption has to be established :

- For example, 1000 points = 50 SGD Loyalty Voucher valid for 2 months. If a customer has 1000 points, the cash register will offer to issue a 50SGD Loyalty voucher that will be printed when the customer makes the purchase.

Customer can use their loyalty voucher during payment

The screenshot shows the POS Explorer software interface. The 'Redemption Points' tab is active, and the 'Redemption Points' menu item in the sidebar is highlighted with a red box. The main window displays a table with the following data:

Redemption Code	Name	Min Points To Redeem	Amount Earned
RP-01	Redemption Points	RML,000.00	RM50.00

Below the table, a form is shown for editing the selected record (RP-01). The form fields are:

- Redemption Code: RP-01
- Name: Redemption Points
- Min Points To Redeem: 1,000
- Amount Earned: RM50.00
- Cash/Voucher: Voucher
- Valid From: 01/01/2015
- Description: (empty)

At the bottom of the form, there are buttons for 'Create New', 'Save', 'Revert', and 'Delete'.
