

Selection of mode of payment in the POS

- After click on “Pay” button, key in amount per mode of payment (multiple payment is possible)
- For Cash payment the amount will be rounded by 5 cents

The screenshot shows a software window titled "Point of Sales Payment E-0003". Inside, the "Payment for ticket E-0003" section is active. It features a numeric keypad for entering the amount, with "RM53.47" displayed in the "Amount To Pay" field. Below the keypad are buttons for "CASH", "VISA/MASTER", "AMEX", and "NETS". A "Pay Using Voucher" section includes a "Show All Vouchers" button and a table with columns: "Select", "Serial #", "Issued To", "Valid Till", and "Face Value". Below the table are fields for "Voucher Amount" and "Change Amount", with the latter showing "(RM53.47)". Two red callout boxes provide instructions: one points to the "Pay Using Voucher" search field with the text "Key in Voucher Number and Value", and the other points to the "Change Amount" field with the text "Calculate Automatically the Amount that is Not Allocated to a Payment Mode".

Select	Serial #	Issued To	Valid Till	Face Value
--------	----------	-----------	------------	------------
