

Selection of mode of payment in the POS

- After click on “Pay” button, key in amount per mode of payment (multiple payment is possible)
- For Cash payment the amount will be rounded by 5 cents

The screenshot shows the 'Point of Sales Payment E-0003' window. At the top, it displays 'Payment for ticket E-0003' and 'Payment'. The 'Amount To Pay' is set to RM53.47. Below this, there are four payment mode buttons: CASH, VISA/MASTER, AMEX, and NETS, each with an adjacent input field. To the right of these buttons is a numeric keypad with buttons for digits 0-9, a decimal point, and a 'CE' (Clear Entry) button. Below the keypad is a 'Pay Using Voucher' section with a 'Show All Vouchers' dropdown and a search icon. A table with columns 'Select', 'Serial #', 'Issued To', 'Valid Till', and 'Face Value' is present but empty. Below the table are fields for 'Voucher Amount' and 'Change Amount', which is currently set to (RM53.47). At the bottom are 'OK' and 'Cancel' buttons. Two red callout boxes with arrows point to the search icon and the 'Change Amount' field, containing the text: 'Key in Voucher Number and Value' and 'Calculate Automatically the Amount that is Not Allocated to a Payment Mode' respectively.

The video below will show the payment process:
