

# Inventory – Masters

## Warehouse

In the Warehouse Master the user is able to create and manage a warehouse. By selecting the Locator tab the user is able to create new locations in the racks; for locating products.

## Account Setting

The Account Settings application allows the user to map the transactions type i.e. Sales, Inventory, Purchase and Expense to update the proper journals and accounts.

## Account Category

The Account Category allows the user to categorize the different type of products, i.e. service, item and which account settings to use.

## Products

The Products application in the Inventory Master allows the user to view the list of products by Account Category, Brands and Market and also allows the users to create new products.

## Product Groups

Product Group view allows user to group products into subgroups e.g. color, category / type, size, etc for multi-dimensions products analysis.

## Product Standard Cost

This view allows user to create and manage product standard cost list.

## Unit of Measurement

Unit of Measurement (UOM) view allows user to define and manage products' UOM

## Shipping Methods

The shipping method in the Master set up allows the user to create the different forms of transport allowed to transport the Goods from one location to the other.

## Inco Terms

The Inco terms rules or International Commercial Terms are a series of pre-defined commercial terms published by the International Chamber of Commerce (ICC). They are widely used in International commercial transactions or procurement processes. A series of three-letter trade terms related to common contractual sales practices, the Incoterms rules are intended primarily to clearly communicate the tasks, costs, and risks associated with the transportation and delivery of goods.

## Provision Scheme

The Provision Scheme Master application allows the user to set any type of provision deemed to uplift the cost for Freight & Handling charges the goods and or transportation, which will have a mapping to the provisions in the accounting module. Within the application the user can create and manage provision schemes.

## Customs Duty

The customs duty application allows the user to setup and create and manage customs duty schemes and also the accounts settings.

# Containers

The Container Master application allows user to create and manage the different shipping Containers sizes, pallets size, cartons size and dimensions.
