

Delivery Order

The Delivery Order view allows the user to view and manage the company's outbound orders. The following is the complete cycle of goods delivery process:

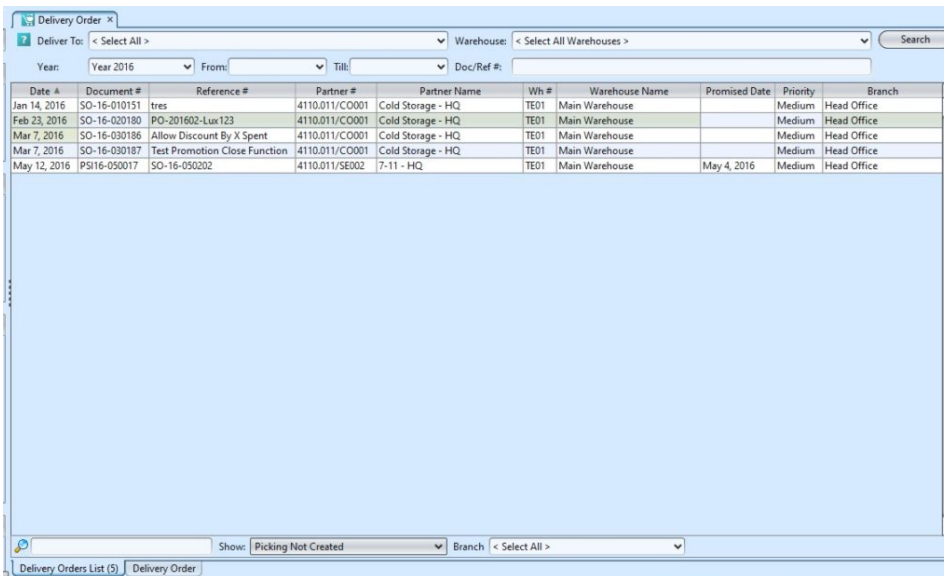

Delivery Order → Picking → Packing → Goods Delivery (→ *Proof Of Delivery) → Sales Invoice**

*Note: Proof of Delivery process is optional, it depend on whether this is set as requirement in the customer's record, "**Account – (Masters) – Customers**". Tick "**Requires Proof of Delivery**" checkbox if the customer requires it.

Below are available actions for the user from "**Delivery Order**" :

 Generate new delivery order

 View all orders or selected orders based on a date range or warehouse or Deliver to location.

The screenshot displays the 'Delivery Order' application interface. At the top, there are search filters for 'Deliver To' (set to '< Select All >'), 'Warehouse' (set to '< Select All Warehouses >'), 'Year' (set to 'Year 2016'), 'From', 'Till', and 'Doc/Ref #'. Below the filters is a table with the following columns: Date #, Document #, Reference #, Partner #, Partner Name, Wh #, Warehouse Name, Promised Date, Priority, and Branch. The table contains five rows of data:
