

# Create Receipt Order

The application allows the user to Create a receipt Order – which is the process of receiving Inbound stocks based on Purchase Order.

1. Click on Inventory tab / Inbound / Receipt Order
2. Select an order from the list of orders

3. Click **"Create Shipment Notice"** then click **"OK"** button to confirm the order and create advance shipment notice

Receipt Order -> Advance Shipment Notice

**Create Advance Shipment Notice from Receipt Order**

**i** Generates the Advance Shipment Notice from Receipt Order with the pending products to be received.
